THE GALOSH MISSILE--MENSURATION

This report presents mensural data on the GALOSH missile as derived from the firing sequence shown in the Soviet film "Twentieth Anniversary of the Great Deed" (Figure 1).

The sequence of exposures began by showing a tower and an elevated capped canister in a launching position. The frames that follow showed the cap being blown clear of the canister and the missile being launched (Figure 2). At no time in the sequence was the complete missile observed; therefore, in order to obtain measurements, it was necessary to establish scale by measuring the missile piece-by-piece from several photographs.
